

Directions for Soup Bowl Cozy

You will need:

- Two 10" squares of cotton fabric
- Two 10" squares of batting
- Thread, fabric pen and ruler

*Note: If you plan to put the cozy in the microwave, then all batting and fabric must be 100% cotton. Any synthetic fabrics will be flammable.

Sewing Directions:

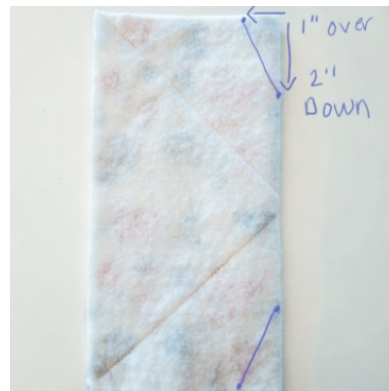

1. Cut out your 10" squares of fabric and batting.

2. Place each of your cotton squares on top of each of your batting squares, right side facing up. Pin in place and draw an "x" on top of the cotton square, from corner to corner. Sew on top of the "x".

3. Fold each square in half. Along the fold line, measure 2" down and mark it with a dot. Then, measure 1" from the fold line across the top; mark it with a dot. With a ruler, line up your dots and draw a line across from one dot to the other. Sew across the lines. Cut corner close to stitching line. Do this on both squares.

4. Fold your square in half the opposite direction, and repeat step 3 on the new fold line. Repeat with 2nd square.

5. Turn one square right side out. Place one square inside the other, right sides together. Pin in place and sew around the perimeter of the square, leaving an opening to turn fabric.

6. Clip your corners and flip the cozy through the opening. Iron your seams to be on the fold line and stitch your opening shut.

And that's it! Your bowl cozy is done!
